“The Father of Electricity”

Imagine, if you can, a world without electricity. Sparks will fly as you meet the great Victorian scientist, Michael Faraday, the man from humble beginnings who changed the world with his discoveries.

Faraday takes you back to the days when electricity was just a scientific wonder. He'll show you his cutting-edge experiments that transformed electricity and magnetism into something a little more practical. Changing the world he lived in into the electrical wonderland we all know today.

A presentation from W. Bro. Darryl Boot PProvAGReg

Darryl Boot is an actor with 30 years of experience, He has worked in theatre, television, in adverts, voice-overs, talking books and radio plays. He has worked extensively in educational theatre. For seven years he toured with Johnny Ball in various educational shows around Britain.
